Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roark in view of Drozt. Roark discloses a self-mounting automobile window screen comprising a flexible mesh screen 12 secured to retaining frames 16,14. The upper and side portions of the retaining frames 16,14 respond to the claimed flexible mounting tube and the bottom portion of the retaining frames 16,14 including the sleeve walls 22 responds to the claimed anchoring base. While Roark does not disclose the use of a lifting means, Drozt discloses a self-mounting automobile window screen comprising a lifting means 34, wherein, to incorporate this teaching into the self-mounting automobile window screen of Roark for the purpose of facilitating the handling and mounting of the self-mounting automobile window screen would have been obvious to one of ordinary skill in the art. The type of material from which the self-mounting automobile window screen is constructed from is considered a mere matter of design preference.

2. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Smith, Fisher, Puffer, Galla, Cole.
